Maxor Breaks Ground on New Mail Order Facility

Maxor National Pharmacy Services, LLC (Maxor), announced today that it plans to open a new 28,800 square foot mail order facility in Amarillo, Texas in April 2018.

Maxor's new state-of-the-art mail facility will have the capacity to fill up to 20,000 prescriptions per day, and will utilize advanced pharmacy automation systems, including a robotic prescription dispensing device. Maxor partnered with pharmacy automation provider, Innovation, to design the automated mail production system and the new facility.

"The new mail order facility positions Maxor extremely well for future growth by using advanced automation and workflow software that help increase operational efficiency while maintaining patient safety and improving the patient experience," said Steve Smith, Executive Vice President, MaxorPlus.

The building of the new mail order facility comes in the midst of the growth of MaxorPlus' Pharmacy Benefit Management business. MaxorPlus continues to focus on managing pharmacy trend, enhancing member engagement, and aligning with its clients to maximize clinical outcomes and financial savings.

About Maxor

Maxor is a leading pharmacy services platform that consists of the following primary business segments: (i) MaxorPlus, providing client and patient focused pharmacy benefit management ("PBM") services; (ii) Maxor Specialty, IV Solutions, and Pharmaceutical Specialties, providing specialty pharmacy, respiratory, and home infusion services; and (iii) Maxor Pharmacy Management and Consulting Services, providing on-site outpatient pharmacy management, 340B audits, and consulting services to health systems, Federally Qualified Health Centers, and employers. More information on Maxor can be found by visiting www.maxor.com.

About INNOVATION

Innovation is the leading provider of Pharmacy Intelligence and pharmacy automation to the retail, hospital, government, and mail order pharmacy markets. Its PharmASSIST family of pharmacy automation and process optimization solutions enable all types of pharmacies to increase operational efficiency, enhance patient safety, and provide a higher quality of patient care.
